Dear Parent/Guardian

<u>Important Message – Online Safety</u>

Police in the U.K. are warning parents about online videos that direct children to harm themselves and threaten them with severe consequences if their instructions are not followed. Name: 'The Momo Challenge'.

The challenge involves messages being hidden in seemingly child-friendly games and videos. The messages urge children to contact "Momo" via Snapchat, WhatsApp or another popular messaging program.

The Momo accounts often feature an image of a doll with large eyes and long, black hair. A Momo-like character has also been spotted in the popular online game Minecraft, Fortnite and Peppa Pig.

Once messaged, police say, Momo may respond with disturbing images and instructions, including directions for self-harm. Momo may also make threats about what could happen if the directions are not followed, saying they will harm the child's family or place a curse on them.

"While the threat of a curse may sound silly to an adult, it could be a very frightening prospect for a young child and they may feel under pressure to carry out acts to protect themselves or family from further harm.

Being aware of yet another malicious use of the internet is very worrying so don't focus only on Momo, but make sure you know what your child has online access to.

You can help your child by;

Ensuring	thei	narental	controls	are	set hig	h
LIIJUIIII	UIC I	DaiCillai	COLLUGIS	alc	JULTIE	

Most importantly make sure you know what your child has online access to.

Remind your child that they must not give out any personal information.

Remind them that no one has the right to make them do something they do not want to do.

Report or block any messages or inappropriate content popping up on devices.

C. Wright			

Principal

It's important to note that new challenges are arising on the internet all the time. We have created to this guide to raise awareness of the issue and offer advice on helping parents to talk to their children about making safer decisions online. See also our '7 conversation starters' guide for more tips on better communication with your child.

Momo is a sinister 'challenge' that has been around for some time. It has recently resurfaced and once again has come to the attention of schools and children across the country. Dubbed the 'suicide killer game', Momo has been heavily linked with apps such as Facebook, WhatsApp, YouTube, and most recently (and most worryingly)... YouTube Kids. The scary doll-like figure reportedly sends graphic violent images, and asks users to partake in dangerous challenges like waking up at random hours and has even been associated with self-harm. It has been reported that the 'Momo' figure was originally created as a sculpture and featured in an art gallery in Tokyo and unrelated to the 'Momo' challenge we are hearing about in the media.

What parents need to know about

There have been recent reports that some seemingly innocent videos on YouTube and YouTube Kids (such as 'surprise eggs', unboxing videos and Minecraft videos) have been edited by unknown sources to include violence provoking and/or other inappropriate content. Even though YouTube monitor and remove videos that include inappropriate content, clips can be uploaded and viewed thousands of times before they get reported and removed. As a parent, it's difficult to spot these videos as the harmful content doesn't appear until partway through the video.

Popular YouTubers and other accounts have been uploading reaction videos, showing their experience of the MOMO challenge. Some of the videos include a disclosure message warning that the content may be "inappropriate or offensive to some audiences" and that "viewer discretion is advised" but these videos are still easily accessed by clicking 'I understand and wish to proceed'. The image of the 'Momo' character can be deeply distressing to children and young people and it's important to note that it may slip through parental settings and filters.

Video apps such as YouTube include an 'up next' feature which automatically starts playing another video based on the video just watched. Due to YouTube's algorithm, users are shown 'suggested videos' that they may be interested in. The thumbnails used on suggested videos are purposefully created in a way to encourage viewers to click them. During our research, we found that when watching one Momo related video, we were shown countless other Momo themed videos and other scary content which would be age-inappropriate for children under 18.

Top Tips for Parents

TELLTHEM IT'S NOT REAL

Just like any urban legend or horror story, the concept can be quite frightening and distressing for young people. Whilst this may seem obvious, it's important for you to reiterate to your child that Momo is not a real person and cannot directly harm them! Also, tell your child to not go openly searching for this content online as it may only cause more distress.

BE PRESENT

It's important for you, as a parent or carer, to be present while your children are online. This will give you a greater understanding of what they are doing on their devices, as well as providing you with the opportunity to discuss, support and stop certain activities that your child may be involved in. As the nature of each task become progressively worse it's also important to recognise any changes in your child's behaviour.

TALK REGULARLY WITH

As well as monitoring your child's activity, it's important for you discuss it with them too. Not only will this give you an understanding of their online actions, but those honest and frequent conversations will encourage your child to feel confident to discuss issues and concerns they may have related to the online world.

Trends and viral challenges can be tempting for children to take part in; no matter how dangerous or scary they seem. Make sure you talk to your child about how they shouldn't succomb to peer pressure and do anything they are not comfortable with, online or offline. If they are unsure, encourage them to talk to you or another trusted adult.

REAL OR HOAX?

As a parent it is natural to feel worried about certain things you see online that may be harmful to your child. However, not everthing you see online is true. Check the validity of the source and be mindful of what you share as it may only cause more worry.

REPORT & BLOCK

You can't always rely on parental controls to block distressing or harmful material. People find ways around a platform's algorithm in order to share and promote this type of material. Due to this, we advise that you flag and report any material you deem to be inappropriate or harmful as soon as you come across it. You should also block the account/content to prevent your child from viewing it. Also encourage your child to record/screenshot any content they feel could be malicious to provide evidence in order to escalate the issue to the appropriate channels.

FURTHER SUPPORT

Speak to the safeguarding lead within your child's school should you have any concerns regarding your child's online activity or malicious content that could affect them.

If your child sees something distressing, it is important that they know where to go to seek hel and who their trusted adults are. They could also contact Childline where a trained counsellor will listen to anything that's worrying them.

The Childline phone number is 0800 1111.
